---

## SUMMARY

Full stack web development boot camp graduate with bachelor's degree in psychology from the University of North Carolina Wilmington. Passionate about designing and building modern and responsive websites.

---

## EXPERIENCE

### Warehouse Worker/Trainer

Target Corporation

Oct 2019 - Jan 2021, Newton, NC

- Helped to improve warehouse efficiency by loading trucks quickly and efficiently at an average production rating exceeding 100%.
- Trained new team members how to maximize their efficiency while maintaining a high standard of safety in an inherently dangerous environment.
- Promoted to trainer position within 8 months of employment.

### Front End Supervisor

Lowe's Foods

May 2019 - Oct 2019, Hickory, NC

- Managed cashiers and baggers while ensuring any impediments to customer satisfaction were resolved quickly.
- Prevented loss by balancing registers at the end of each night and ensuring that no deficit existed.

### Produce Clerk

Lowe's Foods

February 2019 - May 2019, Wilmington, NC

- Maintained appearance of produce department and unloaded delivery trucks while ensuring superior customer service.
- Consistently worked 30+ hours weekly while attending university full-time.

### Warehouse Worker

Target Corporation

May 2018 - Aug 2018, Newton, NC

- Sorted and opened boxes in a timely manner while consistently selected by management to work on special assignments beyond the abilities of typical workers in the position.
- Rehired immediately due to prior work performance and reliability.

### Warehouse Worker

Target Corporation

May 2016 - Aug 2017, Newton, NC

- Unloaded trucks and processed all freight received while maintaining a production rating of 120%.
- Maintained school-work balance while attending both work and college full time.

### Sales Clerk/Stocker

Lowe's Foods

Aug 2014 - May 2016, Hickory, NC

- Promoted from Bagger to Sales Clerk within 1 month of employment and from Sales Clerk to Stocker within 1 year.
- Consistently selected by management to assist other departments of the store due to reliability and work performance.

---

## PROJECTS

### Oversite

2021

- Goal tracking with a twist! Complete your goals or we tell your mom.
- Built with HTML, CSS, JavaScript, React.js.
- Charts.js for beautiful data visualization.
- Passport.js used for authentication across the site.
- Node Cron and Node Mailer for automatic emails.

### The Interview Game

2021

- A web-based game that allows you and a group of friends to have mock interviews in which wacky phrases must be included in your pitch.
- Built using HTML, CSS, Bootstrap, JavaScript, and Socket.js.
- Allows multiple concurrent games with rooms handled by WebSocket connections to the server.
- Game State managed by event calls to and from the server via WebSocket connections.

### What's For Dinner

2020-2021

- A web app to help users decide in recipes or restaurants based on ingredients and cuisine type.
- Built with HTML, CSS, and JavaScript.
- Used The Spoonacular API and Google Places API to implement site functionality.
